Aloha Will,

My section has the lead on the Hickam Housing issue, although we have been working closely with SHWB to approach the project and concerns we have using shared program authorities.

It appears that remedial actions Hickam Community Housing (a local arm of ACTUS) took to manage termiticide contaminated soils in certain neighborhoods was done incorrectly, and they are in the midst of doing a substantive resampling effort to establish the nature and extent of soil exceedances. At the direction of DOH, residents in all potentially affected neighborhoods have been individually notified and given recommendations on limiting soil exposures.

Give me a call and I'd be happy to discuss the situation with you.

Fenix Grange, M.S.

Subject: hickham housing

Hi Fenix,

Will Duncan had some questions about the work here (based on concerns raised by CID)-- who would be the best person for him to talk to in at HEER and/or SHWB ? I remember the discussion we had in April was quite interesting.

thanks,
Eugenia
